Thoroughly justify answers that are numeric or require calculations.

1. Label each grid below using  $x^+$ ,  $x^-$ ,  $y^+$ ,  $y^-$ ,  $z^+$ , and  $z^-$  for the given coordinate axis orientation.

Right-Handed

Left-Handed

2. Identify whether each coordinate system is left- or right-handed.

Plot the point on the given coordinate system. Note: The orientation is not always the same!

3.  $(0, -3, 5)$

4.  $(5, 0, -2)$

5.  $(4, -3, -5)$

Write the coordinates of the given point. Note that the system is not always in the same orientation.

7. If you lay a horizontal ruler on the paper it will pass through the two points shown below. Which of the coordinates of these two points must be equal?
